ORDERING

WHAT IS COMPOUNDING?

Compounding is a pharmaceutical formulation process that produces unique, patient-specific, and often species-specific, dosage forms for patients that cannot tolerate a commercially available product.

WHEN DO YOU NEED COMPOUNDING?

Some of the most common instances that compounded medications are utilized in veterinary medicine are as follows:

- There are no viable commercial product options available to treat the patient's condition
- The prescribed dose is either too large or too small to accurately and realistically administer using commercially available products
- The pet owner or veterinary professional is unable to dose the pet safely with commercially available tablets or capsules but is able to dose the pet with flavored oral liquid
- The pet owner or veterinary professional is unable to dose the pet safely with any oral route but can successfully dose the pet with a transdermal option
- The prescribed medication is available in a dosage form that is a viable treatment option but the flavor it comes in is not pet friendly

Our Services.

UNIQUE, CUSTOMIZED SOLUTIONS

25,000+ compounded formulations

8+ dosage forms

Pet-friendly flavors

Hypoallergenic formulations for pets with allergies or intolerances

Unavailable, or temporarily backordered medications

Bitter-free formulations for unpalatable drugs

FAST, LOCAL DELIVERY

Free shipping using local couriers with 1-3 business day delivery window

Same day prescription pick up

OUTSTANDING CUSTOMER SERVICE

Our team is always available to help with orders and questions

Charge accounts provided for clinics

Easy-to-use online ordering portal for refills

Product Quality and Standards.

-  60+ pharmacy professionals
-  150+ years of combined compounding experience
-  Nearly two decades in business providing quality compounded solutions

DEDICATION TO QUALITY

- Each patient's prescription is made from scratch, using the best ingredients with the highest standards of quality
- Our products are tested by third-party laboratories to ensure they meet or exceed industry standards for purity, potency and sterility
- Our specialized compounding equipment is routinely calibrated and certified to maximize safety and accuracy in our products

Available Dosage Forms.

ORAL LIQUID

Perfect consistency and flavor for easy oral administration

CAPSULE

Gelatin and vegetable capsules in a wide variety of sizes

TRANSDERMAL

Creams, ointments or gels for topical application
