ORDERING

## WHAT IS COMPOUNDING?

Compounding is a pharmaceutical formulation process that produces unique, patient-specific, and often species-specific, dosage forms for patients that cannot tolerate a commercially available product.

## WHEN DO YOU NEED COMPOUNDING?

Some of the most common instances that compounded medications are utilized in veterinary medicine are as follows:

- There are no viable commercial product options available to treat the patient's condition
- The prescribed dose is either too large or too small to accurately and realistically administer using commercially available products
- The pet owner or veterinary professional is unable to dose the pet safely with commercially available tablets or capsules but is able to dose the pet with flavored oral liquid
- The pet owner or veterinary professional is unable to dose the pet safely with any oral route but can successfully dose the pet with a transdermal option
- The prescribed medication is available in a dosage form that is a viable treatment option but the flavor it comes in is not pet friendly

## Our Services.

### UNIQUE, CUSTOMIZED SOLUTIONS

- 25,000+ compounded formulations
- 8+ dosage forms
- Pet-friendly flavors
- Hypoallergenic formulations for pets with allergies or intolerances
- Unavailable, or temporarily backordered medications
- Bitter-free formulations for unpalatable drugs

### SHIPPING OPTIONS FOR EVERY NEED

- A variety of free and upgradeable shipping options for urgent or economical preferences
- Same day prescription pick up

### OUTSTANDING CUSTOMER SERVICE

- Our team is always available to help with orders and questions
- Charge accounts provided for clinics
- Easy-to-use online ordering portal for refills
- Automated refill reminders, mobile phone refill ordering and text message support through our smart phone app

## Product Quality and Standards.

### DEDICATION TO QUALITY

Northwest Compounding is officially accredited by the Accreditation Commission of Health Care (ACHC) for sterile and non-sterile compounding under their PCAB (Pharmacy Compounding Accreditation Board) program. Why it matters:

**Ensuring Quality:** PCAB accreditation assures patients, healthcare providers, and regulatory bodies that Northwest Compounding adheres to the highest standards of quality in compounding.

**Patient Safety:** PCAB accreditation ensures that Northwest Compounding follows precise compounding techniques, uses high-quality ingredients, certified equipment and maintains a sanitary work environment, reducing the risk of contamination and ensuring product safety for each individual patient need.

**Compliance with Regulators:** PCAB accreditation aligns Northwest Compounding with industry regulations and guidelines, including those set forth by the U.S. Pharmacopeial Convention (USP) and the Food and Drug Administration (FDA).

### OUR STANDARDS

- Each patient's prescription is made from scratch, using the best ingredients with the highest standards of quality
- Our products are tested by third-party laboratories to ensure they meet or exceed industry standards for purity, potency and sterility
- Our specialized compounding equipment is routinely calibrated and certified to maximize safety and accuracy in our products

## Available Dosage Forms.

### ORAL LIQUID

Perfect consistency and flavor for easy oral administration

### CAPSULE

Gelatin and vegetable capsules in a wide variety of sizes

### TRANSDERMAL

Creams, ointments or gels for topical application

### MINI TAB

Small, cylindrical tablets easy to hide in pill pockets or food

### ORAL POWDER

Flavored or plain, often mixed with food

### OPHTHALMIC PREPARATION

Sterile eye drops and ointments prepared in our sterile clean room

### OTIC PREPARATION

Drops and ointments applied into the ear

### INJECTABLE

Sterile, injectable products prepared in our sterile clean room
