NORTHWEST COMPOUNDERS' MISSION

Since 2005, our pharmacy has accomplished an important mission: provide high-quality compounded medications and excellent customer service with care and speed.

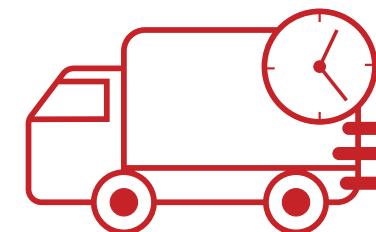

WE DELIVER CUSTOMIZED CARE SO YOU CAN FOCUS ON WHAT IS IMPORTANT, YOUR PATIENTS.

TOP QUALITY

STREAMLINED ORDERING

EXPEDIENT FULFILLMENT

WHAT IS COMPOUNDING?

Compounding is a pharmaceutical formulation process that produces unique, patient-specific, and often species-specific, dosage forms for patients that cannot tolerate a commercially available product.

WHEN DO YOU NEED COMPOUNDING?

Here are some common scenarios where a compounded medication might be utilized:

- There are no viable commercial product options available to treat the patient's condition
- The prescribed dose is either too large or too small to accurately and realistically administer using commercially available products
- The pet owner or veterinary professional is unable to dose the pet safely with commercially available tablets or capsules but is able to dose the pet with flavored oral liquid
- The pet owner or veterinary professional is unable to dose the pet safely with any oral route but can successfully dose the pet with a transdermal option
- The prescribed medication is available in a dosage form that is a viable treatment option but the flavor it comes in is not pet friendly

Our Services.

UNIQUE, CUSTOMIZED SOLUTIONS

- 25,000+ compounded formulations
- 12+ dosage forms
- Pet-friendly flavors
- Hypoallergenic formulations for pets with allergies or intolerances
- Unavailable, or temporarily backordered medications
- Bitter-free formulations for unpalatable drugs

SHIPPING OPTIONS FOR EVERY NEED

A variety of free and upgradeable shipping options for urgent and economical preferences

Same day prescription pick up

OUTSTANDING CUSTOMER SERVICE

Our team is always available to help with orders and questions

Charge accounts provided for clinics

Convenient refill submission options via website, text or phone

Two-way text support

Interactive online catalog for submitting clinic orders and patient-specific prescriptions

DEDICATION TO QUALITY

Northwest Compounds is officially accredited by the Accreditation Commission for Health Care (ACHC) for sterile and non-sterile compounding under their PCAB (Pharmacy Compounding Accreditation Board) program. Why it matters:

Ensuring Quality: PCAB accreditation assures patients, healthcare providers, and regulatory bodies that Northwest Compounds adheres to the highest standards of quality in compounding.

Patient Safety: PCAB accreditation ensures that Northwest Compounds follows precise compounding techniques, uses high-quality ingredients, certified equipment and maintains a sanitary work environment, reducing the risk of contamination and maximizing product safety for each individual patient need.

Compliance with Regulators: PCAB accreditation aligns Northwest Compounds with industry regulations and guidelines, including those set forth by the U.S. Pharmacopeial Convention (USP) and the Food and Drug Administration (FDA).

OUR STANDARDS

- Each patient's prescription is made from scratch, using the best ingredients with the highest standards of quality
- Our products are tested by third-party laboratories to ensure they meet or exceed industry standards for purity, potency and sterility
- Our specialized compounding equipment is routinely calibrated and certified to maximize safety and accuracy in our products

Available Dosage Forms.

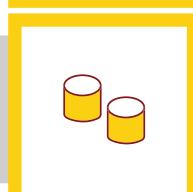

CAPSULE

Gelatin and vegetable capsules in a wide variety of sizes

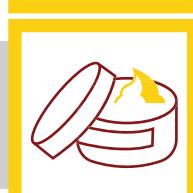

ORAL LIQUID

Perfect consistency and flavor for easy oral administration

MINI TAB

Small, cylindrical tablets easy to hide in pill pockets or food

TRANSDERMAL

Creams, ointments or gels for topical application
